ENCLOSURES: Annotated photograph of Drogobych Petroleum Refinery, "Galicja"

REQUIREMENT RR/HTA/E/R100/56: Determine the location, numbers, and dimensions of the various types of equipment existing in the Drogobych Petroleum Refinery, "Galicja", Drogobych, USSR. Report any evidence of new construction or plant expansion.

REMARKS:

The Drogobych Petroleum Refinery, "Galicja" is located one mile south of the city of Drogobych, in the western part of the Ukrainian S.S.R. This large refinery was almost completely destroyed during World War II. A study of [REDACTED] photography confirms reports that it has been reconstructed, modernized, and enlarged. The major components of the refinery are identified and described on the accompanying annotated photograph.

25X1D

The "Spolka" Petroleum Refinery, located just east of the "Galicja" refinery does not appear to be currently engaged in petroleum refining. Oil storage tanks and characteristic refinery equipment, present in [REDACTED] photographic coverage, are no longer in evidence. This smaller refinery may have been absorbed into the larger adjoining plant.

25X1D

The "Polmin" Petroleum Refinery, the only other refinery in Drogobych, is described in CIA/RR-HTA Photographic Intelligence Brief 4-57.
